

Provider search / fetch — execution and recovery

Semantic pattern: **unstructured input** → **structured artifact** + recovery → visual types: **data flow** + **flowchart** · verified at HEAD `ac770f7`

At-most-one active lease + at-least-once completion + idempotent/binding-protected persistence · recovery band = flowchart detail of the main data flow (overview + detail split)

Provenance manifest — diagram source

Item	Value
Repository commit	Hermes <code>ac770f7</code> (clean tree)
Semantic pattern → type	Unstructured input → structured artifact (Data flow) + recovery (Flowchart) — harvested from cathrynlavery/diagram-design v2.4 @ <code>09df49d8</code> , MIT
Files inspected	<code>src/hermes/research/source_handlers.py</code> (SourceTaskExecutionContext), <code>src/hermes/research/gateway.py</code> (SOURCE_SEARCH/SOURCE_FETCH admission, OQ-5), <code>src/hermes/tools/providers/base.py</code> (ProviderAdapter), <code>src/hermes/tools/providers/ratelimit.py</code> (ProviderRateLimiter), <code>src/hermes/tools/providers/hazards.py</code> (evaluate_hazards, HZ-02), <code>src/hermes/persistence/source_outcomes.py</code> (NEW/IDENTICAL/DIVERGENT, SourceRetracted auto-emit), <code>src/hermes/research/controller.py</code> (NO_SIGNAL ladder, fence)

Architecture documents	IDR-039/040 (Q-04 + SourceRetracted), provider closure package (historical, pinned to 55c35c2 — this figure is verified at the current HEAD, not by that package)
Tests	test_retraction_hazard_emits_the_event_atomically, test_identical_retry_does_not_duplicate_the_event, test_fetch_without_retraction_hazard_emits_no_event, test_15_f15_hung_worker_recovered_after_horizon, test_15_f15_horizon_cliff_late_handler_discarded, rate-limit suite
Node status	All nodes IMPLEMENTED ; dashed red branch = the retraction-only event path; recovery band shows only verified behavior
